**Fieldmarshal® organic Fertilizer only
and get bumper natural crop. !**

BENEFITS OF FIELDMARSHAL ORGANIC FERTILIZER

- Increase the production capacity of the soil.
- Very helpful to produce bacteria in soil which increases the resistant power of crop against Bugs / insects.
- Due to Neem and Tobacco power there is no necessity of insecticide/Pesticide This save money.
- Maintains moisture of soil hence requires less water and prevent to crop from severe infection of the diseases.
- Cheaper than chemical Fertilizer. It is also can be used by mixing with chemical Fertilizer.
- Increase the yield of crops very naturally and crop becomes tasty and more beneficial to the health of human. Soil becomes soft and porous.

IMPAIRMENTS OF CHEMICAL FERTILIZER

- It abolishes the productivity of soil.
- destroy the bacteria from soil which increase natural diseases due to attack of insects.
- Spray of insecticides/pesticides give monetary loses.
- Destroy the moisture of soil hence requires more water for irrigation.
- Infection of Severe diseases to crop consequently harmful to health of human and animals.
- Costlier than organic Fertilizer. Crop becomes tasteless and harmful to health of human due to artificial products.
- Soil becomes tough as like stone.

RECOMMENDED PROPORTION & RIGHT TIME OF USAGE FOR THE VARIOUS CROPS

Name Of Crop	Batter method of usage	Proportion per Acre
Sorghum (Jowar)/Millet (Bajara) / Corn(maize)Castor / mustard / Ground nut / Till / Soyabean Pigeonpea(Tur / Arhar)	Before Sowing Seeds	100 Kgs.
Sugarcane and Lucerne	Before sowing Seed and After 45 Day after sowing	400Kgs.
Papaya / Banana / Cotton / Tobacco / Rice / Cumine / Wheat / Ground nut / Gram / Paddy	Before Sowing Seeds	200Kgs.
Banana / Papaya / Cotton	45 Day after sowing	200Kgs.
Rose / Mogra and Plant	At every 3months after sowing	200Kgs.
Fruit like Mango / Chikoo / Pomegranate / Orange and Coconut / Fig / Tamarind/ Date	During first 4 Year From 6 to 10 Year From 11 Year	4Kgs. 10Kgs. per plant 15 to 20Kgs. per tree
Garlic / Onion / Potato / Tomato / Chili / Grapes and every kind of Vegetables	Before sowing	200Kgs.

NATURAL PROPERTIES OF FIELDMARSHAL ORGANIC FERTILIZER:-

- | | |
|------------------------|--|
| (1) Zink | : Increase the proportion of hormones, enzyme which gives maximum flower and also minimize flower loss. |
| (2) Magnesium | : Necessary for process of photosynthesis by this process plants gets food. |
| (3) Sulfur | : Helpful for making protein in crop. Increase the contents of oil in oilseed crops. |
| (4) Boron | : Essential for pod and its shape and also for healthy grain. |
| (5) Iron | : Necessary for making chlorophyll (Green Substance). |
| (6) Copper & magnesium | : Develop the capacity of resistance from insects and plant diseases. |
| (7) Molybdenum | : This elements increase the number of knot and also increase rhizome bacteria of roots of pulses crops. These bacteria stabilize the atmosphere nitrogen and provide to the plants. |

EFFECT OF FIELDMARSHAL ORGANIC FERTILIZER ON CROPS:-

- (1) Proper growth of plants. (2) Dark green leaves (3) Excellent Fruit and Flowers.(4) Exuberant pod and big grain.(5)Prevent the plant from pallor and control the diseases from fungus and bug.(6) Initially make attractive exuberant leaves and make equilibrium growth plant. (7)Increase the root of plant and make strong. (8) Increase the resistance power against bacterial diseases.
